Ch. 26 Review Questions - Anatomy and Physiology | OpenStax
Figure 22.1.1 – Major Respiratory Structures: The major respiratory structures span the nasal cavity to the diaphragm. Functionally, the respiratory system can be divided into a conducting zone and a respiratory zone. The conducting zone of the respiratory system includes the organs and structures not directly involved in gas exchange.

22.1 Organs and Structures of the Respiratory System ...
• The respiratory system consists of the nose, pharynx, larynx, trachea, bronchi, and lungs. • The visceral pleura covers the surface of the lungs. The parietal pleura covers the mediastinum and

Anatomy Review: Respiratory Structures
Can you name the parts of the Respiratory system? This is covered at GCSE level but give it a go as a revision exercise. You need to get 100% to pass. Have a look at respiratory system anatomy if you need help.

Respiratory System Anatomy Quiz (A Level) - TeachPE.com
From a functional perspective, the respiratory system can be divided into two major areas: the conducting zone and the respiratory zone. The conducting zone consists of all of the structures that provide passageways for air to travel into and out of the lungs: the nasal cavity, pharynx, trachea, bronchi, and most bronchioles.

Ch. 22 Chapter Review - Anatomy and Physiology | OpenStax
Welcome to a whole test on the Respiratory system, related to the 'Young adult' case unit. It also contains some questions from the "Fetal" case unit (hemoglobin dissociation curve, surfactant questions). This test has more than 50 questions on this topic, so, attempt all the questions and examine your knowledge.
