Around the inner portion of the sunroof is a trough that collects and directs water that seeps in through the seal, just like the lower rear of a convertible top. Not high-tech, simple, yet ingenious in design. There are four rubber drain tubes running out of the trough, two in front and two in front. The rule is do not use compressed air to clean them as this will blow the tubes off the nipple connectors and you will have to remove the headline to access.
