Chromebook Classroom is the perfect companion for educators just getting started with Chromebooks - or looking for new ways to boost their students' learning through technology.

Better than fireworks, this classic Beginner Book edited by Dr. Seuss celebrates all the wonderful things that come with summer! From trips to the beach and eating watermelon to fireworks and fishing, Alice Low and Roy McKie ' s Summer will have young readers eager for the kind of fun only warm breezes and sunny weather can bring. Originally created by Dr. Seuss, Beginner Books encourage children to read all by themselves, with simple words and illustrations that give clues to their meaning.

multiple perspectives, this meaty thriller races to a satisfying finish." —People magazine "The intensity of the storytelling is exhilarating and unsettling." —Booklist (starred review) Twenty-six years ago Hannah had her eye shot out. Now she wants justice. But is she blind to the truth? "Arresting...Twisting backward and forward in time, entering the minds of each character in turn, Yates examines both how they reached this point and what happens years later, when the past wreaks havoc on the present....[A] sophisticated...elegant narrative." —The New York Times "The plot is darkly, intricately layered, full of pitfalls and switchbacks, smart and funny and moving and merciless." —Tana French, New York Times bestselling author of *In the Woods* and *The Trespasser* "Dark, intense, and disturbing...Highly recommended." —Krysten Ritter, author of *Bonfire* "Two of life's delicious pleasures—gourmet

delectations and a sinister, plot-twisty tale—come together in this intelligent thriller." —Oprah.com Christopher J. Yates ' s cult hit *Black Chalk* introduced that rare writerly talent: a literary writer who could write a plot with the intricacy of a brilliant mental puzzle, and with characters so absorbing that readers are immediately gripped. Yates ' s new book does not disappoint. *Grist Mill Road* is a dark, twisted, and expertly plotted Rashomon-style tale. The year is 1982; the setting, an Edenic hamlet some ninety miles north of New York City. There, among the craggy rock cliffs and glacial ponds of timeworn mountains, three friends—Patrick, Matthew, and Hannah—are bound together by a terrible and seemingly senseless crime. Twenty-six years later, in New York City, living lives their younger selves never could have predicted, the three meet again—with even more devastating results.

In this comprehensive guide to pottery Kenneth Clark explains with the help of practical and informative text together with step-by-step illustrations and examples of finished work the various aspects of pottery. These include techniques of wedge making, pinching, coiling, slab building, throwing, joining, moulding and turning. In addition Clark gives full details on techniques of decoration, tools and equipment, kilns and firing, glazes, pigments and stains finishing with a full glossary. He also suggests ways in which potters can extend their techniques of production to meet the needs of changing markets and conditions, whilst trying to keep a balance between the work of the artist innovator and the production potter or ceramicist.

Guide For courses in Introductory Psychology
Help students become scientifically literate. An Introduction to Psychological Science helps students view psychology as a practical, modern science--and gives them the tools to better understand our world. Throughout the second edition, authors Krause, Corts, Smith and Dolderman continue to emphasize scientific literacy: the ability not only to define scientific terminology, but also to understand how it functions, to evaluate it critically, and to apply it to personal and societal matters. In addition to helping students master key course objectives, learning how to think scientifically will enable students to categorize the overwhelming amount of information they encounter, as well as ignite their interest in psychological science. An Introduction to Psychological Science, 2ce is also available via REVEL(tm), an immersive learning experience designed for the way

today's students read, think, and learn.

Insolent and defiant, the Chants de Maldoror, by the self-styled Comte de Lautr é amont (1846-70), depicts a sinister and sadistic world of unrestrained savagery and brutality. One of the earliest and most astonishing examples of surrealist writing, it follows the experiences of Maldoror, a master of disguises pursued by the police as the incarnation of evil, as he makes his way through a nightmarish realm of angels and gravediggers, hermaphrodites and prostitutes, lunatics and strange children. Delirious, erotic, blasphemous and grandiose by turns, this hallucinatory novel captured the imagination of artists and writers as diverse as Modigliani, Verlaine, Andr é Gide and Andr é Breton; it was hailed by the twentieth-century Surrealist movement as a formative and revelatory masterpiece.

“ General Relativity Without Calculus ” offers a compact but mathematically correct introduction to the general theory of relativity, assuming only a basic knowledge of high school mathematics and physics. Targeted at first year undergraduates (and advanced high school students) who wish to learn Einstein ’ s theory beyond popular science accounts, it covers the basics of special relativity, Minkowski space-time, non-Euclidean geometry, Newtonian gravity, the Schwarzschild solution, black holes and cosmology. The quick-paced style is balanced by over 75 exercises (including full solutions), allowing readers to test and consolidate their understanding.
