Amazon.co.uk: carbon paper a4

A sheet of carbon paper is placed between two or more sheets of paper. The pressure applied by the writing implement (pen, pencil, typewriter or impact printer) to the top sheet causes pigment from the carbon paper to reproduce the similar mark on the copy sheet(s). More than one copy can be made by stacking several sheets with carbon paper between each pair. Four or five copies is a practical limit. The top sheet is the original and each of the additional sheets is called a carbon copy.

Carbon copy - Wikipedia

The pressure applied to the top ordinary sheet caused the carbon to be imprinted onto the sheet below it so that an exact copy was instantly made. Carbon paper was expensive and the process time consuming and fiddly until paper manufacturers invented a special paper which did the same job as carbon paper. This paper was given the inspirational name of "No Carbon Required" or NCR for short.
