The Human Body for grades 5 to 8 is designed to aid in the review and practice of life science topics specific to the human body. The Human Body covers topics such as all of the body systems, genetics, and healthful living. The book includes realistic diagrams and engaging activities to support practice about all areas of the human body. The 100+ Series science books span grades 5 to 12. The activities in each book reinforce essential science skill practice in the areas of life science, physical science, and earth science. The books include engaging, grade-appropriate activities and clear thumbnail answer keys. Each book has 128 pages and 100 pages (or more) of reproducible content to help students review and reinforce essential skills in individual science topics. The series is aligned to current science standards.

The 100+ Series, Pre-Algebra, offers in-depth practice and review for challenging middle school math topics such as ratios and proportions; rational numbers; and expressions and equations. Common Core State Standards have raised expectations for math learning, and many students in grades 6 – 8 are studying more accelerated math at younger ages. As a result, parents and students today have an increased need for at-home math support. The 100+ Series provides the solution with titles that include over 100 targeted practice activities for learning algebra, geometry, and other advanced math topics. It also features over 100 reproducible, subject specific, practice pages to support standards-based instruction.

"Learning about the human body fascinates children! Investigating how bones and muscles move, how the heart pumps blood, how lungs take in air, and how the senses work is incredible!" --Cover back.

The 100+ Series, Pre-Algebra, offers in-depth practice and review for challenging middle school math topics such as ratios and proportions; rational numbers; and expressions and equations. Bonus activities on each page help extend the learning and activities, making these books perfect for daily review. Common Core State Standards have raised expectations for math learning, and many students in grades 6 Æ 8 are studying more accelerated math at younger ages. The 100+ Series provides the solution with titles that include over 100 targeted practice activities for learning algebra, geometry, and other advanced math topics. It also features over 100 reproducible, subject specific, practice pages to support standards-based instruction.

#1 New York Times bestselling author Christine Feehan pushes the limits in her next novel in the Torpedo Ink series. Isaac "Ice" Koval is on a club mission when he sees a woman who stops him dead in his tracks. Soleil is a sweet, sexy, girl-next-door type. She's an innocent who should be nowhere near the rough-and-ready world of the Torpedo Ink motorcycle club. But Ice knows Soleil belongs with him--and he'll do whatever it takes to keep her. After a life of drifting from one thing to the next, Soleil Brodeur is determined to take control of her life. When her breakup with her manipulative fiancé turns ugly, Soleil searches out the stranger who offered her a lifeline and ends up in a Las Vegas biker bar where she meets a gorgeous, dangerous man straight out of her most secret fantasies. High on adrenaline, she finds herself falling faster than she thought possible. But Soleil knows little about the territory she's stumbled into, and even less about what it really means to be Ice's woman....

The Human Body Quick Starts resource book for fourth to ninth grades prepares students for the day's lesson by providing quick starts that focus on vocabulary, identification, and understanding of the human body. This anatomy resource book includes diagrams and features two to four quick starts per page. Mark Twain Media Publishing Company specializes in providing engaging supplemental books and decorative resources to complement middle- and upper-grade classrooms. Designed by leading educators, this product line covers a range of subjects including mathematics, sciences, language arts, social studies, history, government, fine arts, and character.

The pharmaceuticals industry does it, retail does it — even Hollywood does it: EDI using SAP. Written in an entertaining, narrative style, this book teaches developers and system architects everything needed to plan for, design, and — most importantly — implement a complex SAP-EDI scenario. Enter the glamorous world of Hollywood and see how they make their money through SAP-EDI architectures! 1 Designing the architecture Follow the transition to the new world of EDI by analyzing processes and documenting the legacy systems. A detailed blueprint of the to-be architecture will prepare you for the project. 2 The technical standards Learn everything about EDI data exchange, the SAP IDoc interface, and the tools for building custom IDocs and modifying the standard. 3 Building the SAP EDI system on IDocs Watch the implementation step by step: You ' ll benefit from functional and technical specifications for each interface used, mappings, custom development objects, and lots of code. 4 Preparing and ensuring production Development is complete, now get ready for go-live: Chapters on testing, troubleshooting, and system recovery arm you for the intricacies of daily business. 5 The storyline: A real-world scenario This book doesn ' t just tell you what could be possible — it shows how you do it. Using a real-world order-to-cash scenario with three business partners that begins on the first page, you ' ll follow the implementation phase by phase.

This is a completely revised version of the New General Mathematics series. It has been written specifically to cover the needs of the new 8-4-4 syllabus for the Kenya Certificate of Secondary Education.

A classic text about the social study of food, this is the first English language edition of Jean-Pierre Poulain's seminal work. Tracing the history of food scholarship, The Sociology of Food provides an overview of sociological theory and its relevance to the field of food. Divided into two parts, Poulain begins by exploring the continuities and changes in the modern diet. From the effect of globalization on food production and supply, to evolving cultural responses to food — including cooking and eating practices, the management of consumer anxieties, and concerns over obesity and the medicalization of food — the first part examines how changing food practices have shaped and are shaped by wider social trends. The second part provides an overview of the emergence of food as an academic focus for sociologists and anthropologists. Revealing the obstacles that lay in the way of this new field of study, Poulain shows how the discipline was first established and explains its development over the last forty years. Destined to become a key text for students and scholars, The Sociology of Food makes a major contribution to food studies and sociology. This edition features a brand new chapter focusing on the development of food studies in the English-speaking world and a preface, specifically written for the edition.
