Understanding Diesel
Fuels. By Deanna Sclar.

Diesel fuel is more efficient than gasoline because it contains 10% more energy per gallon than gasoline. But there are a few kinds of diesel fuel: Just as gasoline is rated by its octane, diesel fuel is rated by its cetane, which indicates how easy it is to ignite

and how fast it burns.

Diesel fuel is safer than gasoline because its vapors don't explode or ignite as easily as gasoline vapors.

What is Diesel Fuel

Historically, the quality of automotive fuels in the United States was specified by ASTM standards. Diesel fuels are covered by the
