The Doberman Pinscher is known as one of the most effective guard dogs in the world. Once bred for the sole purpose of being a watch or protection breed, today's Dobermans are being bred with more versatility in mind. Today, the Doberman Pinscher is used for search and rescue, police work, and is a loyal family companion.

The Doberman Pinscher: Brains and Beauty gives potential owners, new converts and veteran Doberman lovers all they need to know about this strong but sensitive companion. There are chapters on the Doberman's history, buying a dog, grooming, temperament, understanding the breed standard, breeding, health concerns and more. Dog shows, obedience competitions and all the activities Dobermans can participate in are discussed. Five appendices include useful resources and top dogs in the breed. Howell Best of Breed Library

ABOUT THE BOOK Doberman Pinschers have a reputation. They are alert watchdogs, fearless war-dogs and loyal protectors of their owners. Karl Lewis Dobermann envisioned a faithful and steadfast companion when he developed the breed in the 19th century. There is no historical record of the various

breeds that helped comprise the Doberman's genetic mix, but many speculate that the Doberman is a product of breeds such as the Manchester Terrier, the greyhound, the Weimaraner, and the Rottweiler. The dogs were bred to optimize quick reaction time, speed, power, and ferocity. This has helped to influence the reputation that has followed the Doberman Pinscher over the years. The breed has been repeatedly, and often unfairly, saddled with a reputation for being vicious and untrustworthy. The reputation is largely a product of exaggeration in the media and fear-mongering. Any claims regarding the Doberman Pinscher viciousness have been mitigated by the fact that breeders have worked to eliminate extraordinary aggression from the breeding pool in recent years. The modern American Doberman Pinscher is considerably less ferocious than its ancestors. MEET THE AUTHOR Pauline T. is an experienced writer and a member of the Hyperink Team, which works hard to bring you high-quality, engaging, fun content. Happy reading! EXCERPT FROM THE BOOK The Doberman Pinscher is often described as a "medium-sized" breed, but this description depends on an one's frame of reference. The standard height of the breed is roughly 28 inches. They typically weigh between 70 and a 100 pounds. The Dobermans long, lanky legs also tend to give an illusion of even greater size. Many consider Dobermans to be a rather large dog. The most unique aspects of the

breeds appearance are their cropped ear and docked tail. The pointed, erect ears of the Doberman symbolise the its power and predatory skills. Pointed ears aid the canine in hunting and stalking its prey. Breeders have maintained the Dobermans natural predatory traits, while domesticating the breed and familiarizing the breed with humans. Cropping the ears involves cutting away the outer parts of the ear, and then using a technique called "posting" which causes them to stand erect. While not presently illegal in the united States, the process of cropping ears and docking tails is against the law in many countries around the world. The dog's reputation as an attack dog, combined with its look, provide a unique, distinctive appearance that seems to signal the breed's willingness and ability to protect its home and family. As much a favorite in the United States as it is in its native Germany, the Doberman Pinscher remains one of the world's most recognizable guardian breeds. Prized for versatility, intelligence, and sleek good looks, the Doberman excels in various forums, including dog shows, working trials, military and police work, assistance dog roles for the blind and deaf, and therapy work. As the history chapter depicts, the Doberman Pinscher was the brain child of Herr Louis Dobermann, who needed a protection dog to accompany him on his rounds as a tax collector. That the breed's history only goes back to the mid-1830s makes the Doberman
