Star Carr | A Mesolithic site in North Yorkshire | Home

Book Description. This book was originally published in 1954. Grahame Clark's excavations at Star Carr from 1949 to 1951 have long been regarded as a model of how archaeological investigation should be conducted. In addition to this, the importance of the site itself has established for this report on the excavations a permanent place in all archaeological libraries.

Excavations At Star Carr: An Early Mesolithic Site at ...

Discovery and initial excavations. Star Carr was discovered in 1947 when John Moore, an amateur archaeologist, noticed flints in the exposed soil of several recently dredged ditches in the eastern Vale of Pickering. One of these sites, bordering on the New Hertford River was to the south of Star Carr Farm. Moore decided to excavate a small trench at Star Carr in 1948 as part of a series of investigations.

Excavations at Star Carr: An Early Mesolithic Site at ...

The Recent Excavations Over the last three years a pilot programme of study has been conducted. In 2003 and 2004 the area was fieldwalked and testpitting undertaken. The sub-surface topography was mapped by a close interval (10m) auger survey and for the first time it was possible to demonstrate a highly variable sub-surface microtopography.

Star Carr: the recent excavation

In this film, Nicky talks about some of the most important discoveries we have made during our recent excavations at Star Carr, from 2004-2015. Further resources You can read more about the excavations and how these progressed from 2004-2015 in Chapter 3 of our book and if you really want to find out the details, all our excavation reports, data, photos and films are accessible on the Archaeology Data Service website.

The recent excavations – FutureLearn

Star Carr is one of Britain's most important archaeological sites. Because of extraordinary conditions of survival, we have uncovered the oldest known house in Britain, the earliest evidence of carpentry in Europe and the oldest complete bow in the world.

Exploring Stone Age Archaeology: The Mysteries of Star Carr

We know this because of the fieldwork of local amateur archaeologist John Moore, who first discovered Star Carr, and Grahame Clark, who excavated it in 1949-51. But everyone knows that Mesolithic people were highly mobile, moving about the landscape in small bands of two or three families.
