The second edition of Nina's Brown's **Psychoeducational Groups** provides an overview of the major learning and instructional theories together with specific guidelines for conducting a variety of psychoeducational groups. Presented are principles of group instruction; specific guidelines for creating groups and understanding phases of group development; and a guide for planning and leading experimental activities. This new edition includes two new chapters covering aspects of group planning and providing examples of preparing themed sessions with special population groups such as children, adolescents and adults.

More than a recipe book of techniques that group leaders can pull out at the right time, this book encourages readers to use techniques sensitively and creatively in their own groups, and to go one step further to invent their own techniques. The authors draw on their combined experiences as teachers, as consultants to mental-health professionals, and as private practitioners to provide a realistic approach to group work. Emphasizing that techniques are means, not ends, the book is designed to enhance the group leader's ability to generate a therapeutic and human rapport between leader and members. Substantial new material includes templates, scripts, and sample forms; suggestions for leader interventions for group and individual issues and difficulties; a social media policy; and the effectiveness of manualized and cyber/virtual groups.
