This lab manual is accessible to science and nonscience majors and also provides a strong background for geology and other science majors. Concepts carry over from one lab to the next and are reinforced so that at the end of the semester, the students have experience at interpreting the rock record and an understanding of how the process of science works.

In this lab book, we will use the web version of Google Earth to show you all of the locations mentioned throughout this lab manual. Google Earth is a composite of satellite images, aerial photographs, and GIS data on a globe. Coverage includes about 98% of the earth. The resolution of the images partly depends on how popular the area is.
