Community nursing is the fastest growing area of nursing practice in Australia. This book offers an engaging introduction to the theory, skills and application of community and primary health care. Based on the 'Social Model of Health', An Introduction to Community and Primary Health Care explores how social and environmental factors impact healthcare in Australian communities. It discusses the principles of health and mental health promotion, the importance of cultural competence and the practice of community needs assessment. The book is divided into three parts - theory, skills and health professionals in practice. This latter section is unique to this book and encourages students to consider how various nursing roles address issues of social justice, equality and access. Readable and highly practical, An Introduction to Community and Primary Health Care equips students with

This introduction to community based nursing roles and concepts focuses on nursing care of the individual in a community setting. The text is divided into four units that cover the knowledge base for concepts and the application of concepts. Basic concepts are presented in the first unit, with discussion of practice settings, levels of prevention, health promotion, the family and cultural considerations. Three basic skills of the community based nursing - communicating, educating and managing - are examined in the second unit. The third unit explains the application of skills and concepts to continuity of care, discharge planning, community resources and referrals and home health practice. The fourth unit prepares the reader for what's ahead, with a look into future trends in community based nursing.

"On every page the work of the community nurse shines through. Exercises, a reflective commentary and case studies provide an integral link between the 'real world' of practice and the underpinning knowledge and critical thinking necessary to become an effective and evidence-based community nurse.
