Endorsed for Edexcel Develop your students' knowledge of the foundations of modern psychological understanding with this detailed textbook for Edexcel AS and A level Psychology, with targeted activities and clear explanations to build practical, mathematical and problem-solving skills Written by experienced author and examiner Christine Brain, this AS and year one A level textbook is fully mapped to the new Edexcel specification. - Helps students build their confidence in practical, mathematical and problem-solving skills through well-presented explanations and activities - Develops understanding and helps each student reach their potential with the essential information covered in a clear, logical format, supported by illustrations, questions and extension tasks - Supports you and your students through the new specification, with accessible coverage of all the key areas of Psychology for AS and year one of A level - Encourages your students to develop their interest in Psychology and its applications, with extension tasks and relevant content

The perfect study companion, *Animal Biology and Care*, 3rd Edition is specifically designed for students on animal care, animal nursing assistant and veterinary care assistant courses. This edition is fully updated with new course content, a refreshed design and colour illustrations throughout. Basic biological theory is introduced with diagrams for visual learners while photographs demonstrate the common practical procedures carried out by animal care assistants. Key features include: New content on exotic species, recognising the increasing number of these animals kept as pets. Extensive coverage of the Animal Welfare Act 2006 and recent advances in animal welfare. Written in line with course curricula, chapter summaries help you to remember key points and learning objectives. A companion website has interactive MCQs to help you test your knowledge. Divided into three main sections covering animal science and genetics, health and husbandry and nursing procedures, this book will help lay the foundations for a successful career in animal care and management!

Written by experienced examiners, this revision guide for A2 biology provides tailored support for the 2008 specification.

This revised set of resources for Cambridge International AS and A Level Business syllabus (9609) is thoroughly updated for the latest version of the curriculum. Written by experienced authors, the Coursebook provides comprehensive coverage of the syllabus. Accessible language combined with the clear, visually-stimulating layout makes this an ideal resource for the course. Questions and explanation of key terms reinforce knowledge; different kinds of activities build application, analytical and evaluation skills; and case studies contextualise the content making it relevant to international learners. It provides thorough examination support for all papers with exam-style questions with each chapter and an extensive Paper 3 style case study with each unit. The student CD-ROM contains revision aids, further questions and activities. A Teacher's CD-ROM is also available.

This revised set of resources for Cambridge IGCSE Business Studies syllabus 0450 (and Cambridge O Level Business Studies syllabus 7115) is thoroughly updated for the latest syllabus for first examinations from 2015. Written by experienced teachers, the Coursebook provides comprehensive coverage of the syllabus. Accessible language combined with the clear, visually-stimulating layout makes this an ideal resource for the course. Questions and explanation of key terms reinforce knowledge; different kinds of activities build application, analytical and evaluation skills; case studies contextualise the content making it relevant to the international learner. It provides thorough examination support for both papers with questions at the end of each chapter and an extensive case study at the end of each unit. The CD-ROM contains revision aids, further questions and activities. A Teachers CD-ROM is also available.

This unique and innovative Revision Book supports all learning styles so that every student can achieve the best results. Whether you are a visual, auditory or kinaesthetic learner, this revision guide supports the revision techniques that you are most su

This series is endorsed by Cambridge International Examinations and is part of

Cambridge Maths.

A2-Level Biology AQA Complete Revision & Practice

Every day human organisations fail. Building Anti-Fragile Organisations explores a powerful alternative framework for risk in the design and management of human systems. Anti-Fragility is a new way of thinking about mitigating risk that builds on earlier work on the characteristics of biological systems that, being more than just robust, actually improve their resilience through being stressed. Professor Bendell explains how applying this concept to the development and management of organisations, services and products, allows us to identify the characteristics that will not only mitigate against the realisation of hazards, but enable growth in protection, strength and anti-fragility over time. In this context, anti-fragility also encompasses flexibility, agility and the exploitation of opportunities. At the organisational level, anti-fragility (or its absence) is determined by the organisational strategy, structure and systems, its people, relationships and culture. The book focuses on establishing the Anti-Fragile concept of the firm, and explores its application in private and public sector organisations of all types. It identifies characteristics relevant to survival in a turbulent world, and how our approaches to risk and governance need to change in order to create and manage anti-fragile organisations. It provides practical insight into the concept of Anti-Fragility and its deployment within human organisations of all types, and give readers the opportunity to start to make sense to applying the concepts within their own worlds.
