Two lonely towns in Colorado: Hope and Despair. Between them, twelve miles of empty road. Jack Reacher never turns back. It's not in his nature. All he wants is a cup of coffee. What he gets is big trouble. So in Lee Child's electrifying new novel, Reacher—a man with no fear, no illusions, and nothing to lose—goes to war against a town that not only wants him gone, it wants him dead. It wasn't the welcome Reacher expected. He was just passing through, minding his own business. But within minutes of his arrival a deputy is in the hospital and Reacher is back in Hope, setting up a base of operations against Despair, where a huge, seething walled-off industrial site does something nobody is supposed to see . . . where a small plane takes off every night and returns seven hours later . . . where a garrison of well-trained and well-armed military cops—the kind of soldiers Reacher once commanded—waits and watches . . . where above all two young men have disappeared and two frightened young women wait and hope for their return. Joining forces with a beautiful cop who runs Hope with a cool hand, Reacher goes up against Despair—against the deputies who try to break him and the rich man who tries to scare him—and starts to crack open the secrets, starts to expose the terrifying connection to a distant war that's killing Americans by the thousand. Now, between a town and the man who owns it, between Reacher and his conscience, something has to give. And Reacher never gives an inch.

But The Tao of Spycraft is more than an examination of military tactics; it also provides a thorough overview of the history of spies in China, emphasizing their early development, ruthless employment, and dramatic success in subverting famous generals, dooming states to extinction, and facilitating the rise of the first imperial dynasty known as the Ch'in.

Twenty-five-year-old Steven faces a bleak life with a sadistic mother and a job at a slaughterhouse where he is confronted with extreme violence and death.

Is there anyone who doesn't wonder now and again about how differently their life could have turned out? About a more interesting, more adventurous, more dangerous past they could have had? Ben Dibbuk is married to the beautiful Mona, has a lovely daughter and a well-paid job in NYC - but he's been locked in this dream for more years than he can say. But nothing can prepare Ben for his chance meeting with Star, a mysterious woman at a launch for the hip magazine Diablerie - because Star claims to share a gruesome secret that Ben just can't remember. Has Star spun a diabolical web of lies, or

could it be that something terrible really did happen back in June 1979? Ben's grip on the truth begins to falter, and the line between what really happened and what might have done becomes harder and harder to negotiate ... Walter Mosley, creator of sometime-fixer Easy Rawlins who appeared in classic thrillers such as Devil in a Blue Dress, and recently, the shocking deliciously scandalous Killing Johnny Fry, is one of former US president Bill Clinton's favourite authors.

California's Silicon Valley is home to the greatest concentration of designers in the world: corporate design offices at flagship technology companies and volunteers at nonprofit NGOs; global design consultancies and boutique studios; research laboratories and academic design programs. Together they form the interconnected network that is Silicon Valley. Apple products are famously "Designed in California," but, as Barry Katz shows in this first-ever, extensively illustrated history, the role of design in Silicon Valley began decades before Steve Jobs and Steve Wozniak dreamed up Apple in a garage. Offering a thoroughly original view of the subject, Katz tells how design helped transform Silicon Valley into the most powerful engine of innovation in the world. From Hewlett-Packard and Ampex in the 1950s to Google and Facebook today, design has provided the bridge between research and development, art and engineering, technical performance and human behavior. Katz traces the origins of all of the leading consultancies -- including IDEO, frog, and Lunar -- and shows the process by which some of the world's most influential companies came to place design at the center of their business strategies. At the same time, universities, foundations, and even governments have learned to apply "design thinking" to their missions. Drawing on unprecedented access to a vast array of primary sources and interviews with nearly every influential design leader -- including Douglas Engelbart, Steve Jobs, and Don Norman -- Katz reveals design to be the missing link in Silicon Valley's ecosystem of innovation.

"Who was Louki? Did anyone really know? She made her mark on all of us in different ways. We all remember her, some of us more than others, but did any of us truly know her? Can anyone honestly say they know another person? In the Cafe of Lost Youth is vintage Patrick Modiano, an absorbing evocation of a particular Paris of the 1950s, shadowy and shady, a secret world of writers, criminals, drinkers, and drifters. The novel, which includes vignettes of a number of historical figures and is inspired in part by the circle (depicted in the photographs of Ed van der Elsken) of the notorious and charismatic Guy Debord, centers on the enigmatic, waiflike figure of Louki, who catches everyone's attention even as she eludes possession or comprehension. Through the eyes of four very different narrators, we contemplate Louki's character and her fate, while Modiano explores the themes of identity, memory, time, and forgetting that are at the heart of his hypnotic and deeply moving art"--

"In the second Maidels of Morning Star novel by fan-favorite author Charlotte Hubbard, the five friends who have teamed up to transform an abandoned barn into an Amish marketplace are enjoying the success of their fledgling enterprise. What's

even more remarkable is the gift the business bestows upon each of these unmarried women--the unexpected blessing of love as the new school teacher and the bishop find strength in their growing bond. Leaving Flaud's Furniture to teach at the community's new school is a joy for Lydianne Christner. Old Order Amish, but new to Morning Star, she's grateful that the congregation trusts her with the position--but she panics when handsome Bishop Jeremiah Shetler asks about the life she left behind. If anyone discovers the secret she's hiding, she would, quite rightly, be shunned. A widower, Bishop Jeremiah admires young Lydianne's youthful energy and skill with the children. He's also curious about her past, and the burden he senses on her heart. When his request to court her is refused, he's stung, and lonelier than ever. It isn't until a crisis prompts a tearful Lydianne to confess to him that Jeremiah is faced with a choice that requires all of his faith--and teaches them both that love and forgiveness go hand in hand."--Provided by publisher.

An intriguing account of a seminal sexual harassment lawsuit describes the experiences of Lois Jenson, a single mother who endured a shocking degree of sexual harassment on her job with a local mine before suing the company that had ignored her pleas for help, in a case that took twenty years to settle and transformed the American legal system. Reprint. 15,000 first printing.
