An excellent resource for new or seasoned NPs and PAs! The Nurse Practitioner in Long-Term Care addresses the growing trend to utilize the nurse practitioner in the skilled nursing facility (SNF) to manage patients in long-term care and serves as a practical resource for managing those conditions commonly encountered in the geriatric patient. It includes an introduction to nursing homes, medication management, practical health promotion/disease prevention, and management of common clinical conditions specific to the skilled and long term care nursing home settings. It will also address important topics such as elder abuse, legal issues, reimbursement, and regulatory issues. Subjects covered are pertinent to everyday practice and this text is useful in graduate programs for nurse practitioners and clinical nurse specialists as well as for physician's assistant (PA) students.

its second iteration, *Geropsychology and Long Term Care: A Practitioner's Guide*. Education of psychologists working in long-term care settings is consistent with PLTC's mission to assure the provision of high-quality psychological services for a neglected sector of the population, i.e., residents in nursing homes and assisted-living communities. To this end, direct training of generalist psychologists in the nuances of psychological care delivery in long-term care settings has been a major priority. It is a tribute to the accelerating nature of research in long-term care settings that a revision is now necessary. After all, the Professional Educational Training Manual's initial publication date was only in 2001. However, in the intervening years, much progress has been made in addressing assessment and intervention strategies tailored to the needs of this frail but quite diverse population. It is so gratifying to be able to say that there is now a corpus of scientific knowledge to guide long-term care service delivery in long-term care settings.

This manual offers a quality documentation system using nursing diagnosis developed specifically for long-term care. It provides practical quality tools to guide professional nurses and interdisciplinary staff members in meeting documentation requirements under OBRA '87.
