MOULD RELEASE OILS | Lubricon

The only product that is universally recognized in the industry (for use on latex molds) is castor oil. Here's the formula: Mix one part castor oil with eight parts rubbing alcohol. Put it in a spray bottle and then mist it on your mold. After the alcohol evaporates, it will leave a fine film on the inside of your mold. Now fill with concrete.

DIY Release Spray For Latex Mold | My Sculptures Gallery

Releasing oil, or form release oil, is a product used for coating concrete forms and molds to ensure that the concrete does not stick irrevocably to them as it dries. There are different types of releasing oils available in the marketplace, but most of them are made up of chemicals and require much precaution during use.
