Financial & Management Accounting An Introduction seventh edition Pauline Weetman The seventh edition of this well-respected and fully updated text retains all of the features that have contributed to the book's popularity: focus on the accounting equation, student activities and real-life commentaries throughout each chapter, a clear and accessible writing style, and inclusion of real-world case studies. With a strong emphasis on the Conceptual Framework of the International Accounting Standards Board, Financial & Management Accounting: An Introduction guides students in understanding the 'why' and not just the 'what' of financial and management accounting. Key features: New case studies containing examples from real-world companies New coverage on fair value throughout New coverage of the Strategic Report and Directors' Report Fully up-to-date with International Financial Reporting Standards, IFRS Focuses on specific knowledge outcomes, with end-of-chapter self-evaluation Questions are graded according to difficulty to test student understanding Definitions and terminology is fully in-line with the revised IASB Conceptual Framework Experience-driven conversations between two managers are included throughout, providing a practical examination of real life scenarios. Financial & Management Accounting: An Introduction is aimed at first-level undergraduates on business studies degrees taking introductory financial and management accounting classes; first-level specialist accounting undergraduate students; introductory core accounting for MBA and postgraduate specialist Masters students, focusing on analysis through the accounting equation and a questioning approach to problem solving; and professional courses where accounting is introduced for the first time. "MyAccountingLab advert" Pauline Weetman BA, BSc (Econ), PhD, CA, FRSE, is Professor Emerita of Accounting at the University of Edinburgh, and has extensive experience of teaching at undergraduate and postgraduate level, with previous chairs held at Stirling, Heriot-Watt, Strathclyde and Glasgow Universities. She received the Distinguished Academic Award of the British Accounting Association in 2005. She has convened the examining board of the Institute of Chartered Accountants of Scotland and was formerly Director of Research at ICAS.

Business Accounting has been developed specifically for the needs of non-specialist students studying accounting as part of another degree. The authors explain the key concepts clearly and concisely, using examples, cases and real company data to contextualise the theory. Ethics, corporate governance and corporate social responsibility is given more prominence in this new edition and a new chapter on the statement of cash flows has been added. The number of questions in the book and online has been increased substantially to provide students with more opportunity to test their understanding and provide lecturers with more materials to perform assessments.

Provides students with an introduction to financial and management accounting. This text is suitable for first-level undergraduates on business studies degrees taking introductory financial accounting and management accounting classes.

Prepare your MBA students to become successful managers, not just leading accountants, with the proven success of MANAGERIAL ACCOUNTING: AN INTRODUCTION TO CONCEPTS, METHODS AND USES, 11E. This edition effectively balances coverage of concepts, methods, and the uses of managerial accounting with a strong emphasis on management decision-making. Students focus on concepts and managerial uses of financial information, rather than simply perfecting the accounting techniques. This edition combines core managerial accounting concepts with the latest cutting-edge material that is relevant to all managers and decision makers. A continued emphasis on international issues prepares students for today's globalized business environment. This edition also highlights the strategic effects of decisions, ethics, and new management accounting trends to prepare students for the challenges of today's workplace. Numerous realistic examples and application problems help emphasize the skills most critical today including process improvement and integrating financial reporting issues within management decision-making. Students also learn to apply managerial accounting tools to the emerging service sector, government, and nonprofit organizations with new coverage of risk management and internal controls. Select MANAGERIAL ACCOUNTING, 11E to truly prepare your MBA students to be the successful managers they are meant to be. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book deals comprehensively with the elements of cost accounting, their application to costing methods, and their significance for management through budgetary control, short term decision-making, and capital budgeting. It is an extensive revision of the author's well-known costing text, and provides the student with a complete introduction to cost accounting. Relevant exercises are included at the end of each chapter, with solutions at the end of the book. These include many from recent examinations of the major professional accountancy bodies. Teachers are thus able to use their own favourite examples in lecture or class, and to refer students to other exercises for further practice. Students who are unable to attend a regular course will be able to check their work against the solutions. A series of multiple choice questions throughout the book provides a further opportunity for the student to check personal progress. Other features of the book include: a complete introduction to cost accounting; new material on capital budgeting and cost accounting for service activities; an explanation of budgetary control including behavioural aspects; and graded questions and MCQs throughout (definitions follow CIMA terminology).

This first New Zealand edition of Accounting: An Introduction provides a solid introduction to financial and management accounting and finance for those needing to acquire an understanding of key concepts and their practical application in decision-making. The emphasis is on the application and interpretation of information for decision-making, and on the underlying concepts, rather than on the collection of data and the preparation of statements and reports. Aimed primarily at students who are studying accounting and finance as part of a university degree or MBA course, this text is designed specifically for the
