MATHEMATICS FOR ENGINEERING STATISTICS TUTORIAL 1 – BASICS OF STATISTICAL DATA This tutorial is useful to anyone studying engineering. It uses the principle of learning by example. On completion of this tutorial you should be able to do the following. Explain the use of raw data.

MATHEMATICS FOR ENGINEERING STATISTICS TUTORIAL 1 BASICS ...

SOLUTION. The probability of calling correctly when a coin is tossed is $p = 1/2$. The probability of getting it correct three times is $P = (1/2)(1/2)(1/2) = 1/2^3 = 1/8$. In other words three events so $n = 3$ and two possibilities for each so $1/p = 2$ so $P = (1/2)^3 = 1/8$.

As the right hand side converges to zero as $m \rightarrow \infty$, this shows that X is admissible. () We now have to show that if (i) or (ii) do not hold, then T is not admissible. This means we have to consider two cases: $a > 1$ and $a = 1, b = 0$. In the case $a > 1$, we have $R(aX + b) = \text{var}(aX + b) > 1 = R(X)$, so $aX + b$ is not admissible.
