The rise in cruise tourism to volcanic sites means many visitors aren't used to wild environments. "Even geography undergrads have been known to turn up to active volcanoes in heels," Donovan says. Sturdy shoes are a must – at the very minimum. But the only way to avoid risk at all is simple: stay well away.

In more modern times, the tourism geography has become to achieve a broader definition, regarding the study of the spatial and temporal genesis, repartition and unfolding of the tourism phenomenon, being considered as a complex and specific interaction at the level of the geographic environment. As such, tourism geography studies things like the tourist resources (natural or man-made), the tourism infrastructure (transportation, accommodation, etc.), the types and forms of tourism, the ...
