Remove any protective cover and position your bucket or pan beneath the drain plug and loosen with a wrench until the oil starts running. Be prepared for a lot of liquid, as most cars spit out...

How to Change Your Oil | The Manual

If you're using conventional oil, changes are recommended every 3,000 to 5,000 miles. Synthetic oil may allow for longer intervals between changes. Consult your owner's manual, a repair guide, the oil jug, or talk to an AutoZoner for more specific intervals for your vehicle.

How to Change Your Oil - Step-by-Step Oil Change Instructions

**If you plan to change your oil regularly, consider investing in a small tool set, an oil filter wrench set, a quality floor jack and jack stands. Step 1 -- Park your car on a level surface and apply parking brake. Run your engine for 5 minutes before draining oil, as warm oil drains faster than cold.

Oil Change | NAPA Auto Parts

Oil Change Guide. The standard 3,000 mile parameter between oil changes is a thing of the past. However, changing the oil at the correct time is still one of the most important aspects of keeping your vehicle in good working order. As advancements in oil-based technologies continue to change the manner in which oil life is expended and measured, consumers have been left asking, "How often do I really need to change my oil?".

The Simple Guide to Oil Changes | CarAdvice

Your old, gunky oil filter will be removed and replaced with a clean, lubricated, new one. Next, your engine will be refilled with new oil. Your tech will tell you which type of oil is being used so that you know what kind to top off with if you need to. A full-service oil change includes a range of other valuable services.

Oil Change Guide | How Often, Which Type, & Other FAQs

or "Which transmission oil?", the LIQUI MOLY Oil Guide has the answer. Clean the oil filter neck and pour in the new oil using a funnel. Typically, you'll use 4 to 5 quarts of oil, but check your manual for your vehicle's oil capacity. Fill to three-quarters of the engine's capacity to avoid overfilling, as there is always oil that does not drain.

Oil Change Guide | Fred Beans

There is no given lifetime of an oil filter. Usually, you need to replace the oil filter when you replace the oil. That means you can stick to the period inside the car's manual. A good practice is to change your oil and along with it the oil filter every 6000 miles (approx 10000km). That way the engine will thank you.

Can I Change Oil Without Changing Oil Filter? - The Cars Guide

Getting Started - Prepare for the repair. 2. Open the Hood - How to pop the hood and prop it open. 3. Find Oil Drain - Locate the oil drain plug underneath the vehicle. 4. Drain Oil - Set up the workspace, drain oil and replace plug. 5. Find Oil Filter - Locate the oil filter.

Oil & Filter Change Chevrolet Equinox (2018-2019) - 2018 -

When the system has calculated that oil life has been diminished, it will indicate that an oil change is necessary. A change engine oil light and a CHANGE ENGINE OIL SOON message will come on. Change the oil as soon as possible within the next 600 miles (1 000 km). It is possible that, if you are driving under the best conditions, the oil life system might not indicate that an oil change is necessary for over a year.
