Math Skills by Objectives teaches basic math skills and shows students how to apply the skills they have learned to their daily lives. This three-volume program is organized by learning objectives -- subskill by subskill -- so that both students and teachers know exactly what their goals are. The evenly paced, methodical style of instruction develops student confidence and mastery so students never go on to a new subskill or skill unless they have mastered the

For freshman/sophomore-level courses treating calculus of both one and several variables. Clear and Concise! Varberg focuses on the most critical concepts freeing you to teach the way you want! This popular calculus text remains the shortest mainstream calculus book available - yet covers all the material needed by, and at an appropriate level for, students in engineering, science, and mathematics. It's conciseness and clarity helps students focus on, and understand, critical concepts in calculus without them getting bogged down and lost in excessive and unnecessary detail. It is accurate, without being excessively rigorous, up-to-date without being faddish. The authors make effective use of computing technology, graphics, and applications. Ideal for instructors who want a no-nonsense, concisely written treatment.

For the multivariable component of three-semester or four-quarter courses in Calculus for students majoring in mathematics, engineering, or science. This package includes MyLab Math. Clarity and precision Thomas' Calculus, Multivariable helps students reach the level of mathematical proficiency and maturity you require, but with support for students who need it through its balance of clear and intuitive explanations, current applications, and generalized concepts. In the 14th Edition, new co-author Christopher Heil (Georgia Institute of Technology) partners with author Joel Hass to preserve what is best about Thomas' time-tested text while reconsidering every word and every piece of art with today's students in mind. The result is a text that goes beyond memorizing formulas and routine procedures to help students generalize key concepts and develop deeper understanding. Personalize learning with MyLab Math. MyLab(tm) Math is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. For courses in Intermediate Algebra. Active learning for active minds The authors of the Mathematics in Action series believe that students learn mathematics best by actually doing the math within a realistic context. If a student is taking this course, why teach them the same content in the same way that they've already seen--yet did not retain? Following this principle, the authors provide a series of guided-discovery activities that help students to construct, reflect upon, and apply mathematical concepts, deepening their conceptual understanding as they do so. The active style of learning develops critical-thinking skills and mathematical literacy, while keeping the concepts in the context of real applications. The 6th Edition includes updated examples and activities for maximum interest and relevance, along with new and enhanced digital resources in MyLab(tm) Math to support conceptual understanding for students, wherever and whenever they need it.
