Thinking Exercises, Key Concept and Spotlight on Sustainability boxes, Go Green tips, and Point/Counterpoint debates, along with the updated statistics and data of key issues, encourage readers to become much deeper and more critical thinkers. Current and highly relevant, the Tenth Edition discusses the challenges of the growing human population and resource depletion and solutions that address these issues in a sustainable manner. The book also discusses nonrenewable and renewable energy options and their pros and cons, and provides expanded coverage of local, regional, national, and global environmental issues and sustainable solutions. This comprehensive text includes updated coverage of environmental economics, ecology, and the application of science and technology to environmental concerns. With a strong focus on sustainability and critical thinking, a topic the author introduced to the environmental science market, Environmental Science, Tenth Edition is an essential resource for students to understand the impact they have on the environment and ways that they can help solve them. With Navigate 2, technology and content combine to expand the reach of your classroom. Whether you teach an online, hybrid, or traditional classroom-based course, Navigate 2 delivers unbeatable value. Experience Navigate 2 today at [www.jblnavigate.com/2](http://www.jblnavigate.com/2)

the life of one tiny tree as it survives despite all odds and grows generation by generation into the tallest tree on earth today. A recipient of a silver Eureka! Award from the California Reading Association for outstanding nonfiction. A children's book about how a once tiny seedling, deep in the forest of Redwood National Park, that was protected by the animals and plants that surrounded it, stretched toward the sun to become the tallest known tree on earth. It survived ecological and human threats and flourished for over 1200 years. Logging in the nineteenth and twentieth centuries depleted the coastal redwood population significantly. But the creation of northern California's Redwood National Park in 1968 helped to save some of the ancient trees, like this one. The tree was discovered by tall tree scientists in 2006, but in the hopes to keep the tree safe, its exact location is kept secret. Susan Swan's eye-catching illustrations are made of found objects and hand-painted papers bringing a natural depth and texture to the story. Peppered with impressive facts about trees and extensive backmatter, Pearson proves that every tree has a story to tell.
