Across America, universities have become big businesses!and our cities their company towns. But there is a cost to those who live in their shadow. Urban universities play an outsized role in America's cities. They bring diverse ideas and people together and they generate new innovations. But they also gentrify neighborhoods and exacerbate housing inequality in an effort to enrich their campuses and attract students. They maintain private police forces that target the Black and Latinx neighborhoods nearby. They become the primary employers, dictating labor practices and suppressing wages. In the Shadow of the Ivory Tower takes readers from Hartford to Chicago and from Phoenix to Manhattan, revealing the increasingly parasitic relationship between universities and our cities. Through eye-opening conversations with city leaders, low-wage workers tending to students' needs, and local activists fighting encroachment, scholar Davarian L. Baldwin makes clear who benefits from unchecked university power!and who is made vulnerable. In the Shadow of the Ivory Tower is a wake-up call to the reality that higher education is no longer the ubiquitous public good it was once thought to be. But as Baldwin shows, there is an alternative vision for urban life, one that necessitates a more equitable relationship between our cities and our universities.

In this compelling, powerful book, highly respected writer and commentator Jack Holland sets out to answer a daunting question: how do you explain the oppression and brutalization of half the world's population by the other half, throughout history? The result takes the reader on an eye-opening journey through centuries, continents and civilizations as it looks at both historical and contemporary attitudes to women. Encompassing the Church, witch hunts, sexual theory, Nazism and pro-life campaigners, we arrive at today's developing world, where women are increasingly and disproportionately at risk because of radicalised religious belief, famine, war and disease. Well-informed and researched, highly readable and thought-provoking, this is no outmoded feminist polemic: it's a refreshingly straightforward investigation into an ancient, pervasive and enduring injustice. It deals with the fundamentals of human existence -- sex, love, violence -- that have shaped the lives of humans throughout history. The answer? It's time to recognize that the treatment of women amounts to nothing less than an abuse of human rights on an unthinkable scale. A Brief History of Misogyny is an important and timely book that will make a long-lasting contribution to the efforts to improve those rights throughout the world.

Describes the life of Gaius Suetonius Paulinus, Governor of Britain, and his love affair with Nero's mother, who entangles him in a plot to steal the gold of a Celtic queen

When Susan's beloved husband Ian was killed in a helicopter accident in June 1994, she faced overwhelming despair. Her pain was compounded when her parents died just months later. But Susan had two children and a determined outlook, and was on a mission to testify to the important work Ian had done in the struggle to bring peace and stability to Northern Ireland. She wrote a hugely successful book about Ian, but once she'd finished, she realized she herself was still in terrible pain. Gradually, though, she came to understand through the power of her angel guides and with help from clairvoyants that Ian was indeed, as she had suspected, still very much a real part of her life. This is a unique memoir of a one woman's struggle back from despair and of the inspirational help available to all of us from the spirit world. Susan never believed that she'd be beaten by what life had thrown at her and this is a story of warmth, humor, candor, and faith to inspire us all.

Vague references to the 'war on terror' and the 'threat to national security' are frequently used by venal politicians to cover-up criminal associations and covert illegal activity, ranging from money-laundering, narcotics trafficking, abduction and murder to the wholesale slaughter of non-combatant civilians - glibly dismissed as 'collateral damage' in mainstream media coverage of state terror, from the Caucuses to the Middle East and the streets of European capitals, while locally, in towns and villages that never make headlines, predatory Catholic clergy and radical Islamic academics and imams abuse trust to accommodate their personal agendas of greed, lust and revenge. The issues in Understanding Shadows include how the overweening pride of US and European intelligence agencies contributed to the development of the 'Islamic' bomb, and the proliferation of nuclear technology; crime and extra-judicial 'punishment' in Russia and abroad under President Putin; and how the bloody and brutal end of 'democratic Islam' in Algeria has facilitated the "fear and loathing! which has dominated the West's security agenda since 9/11.The arrogance and political hubris of former British PM, Tony Blair, and the corrupt use of intelligence, took the UK to war in Iraq, and was a factor in the lonely death of WMD specialist, Dr David Kelly, while 'off stage' Israel continued its colonization of occupied Arab lands and upgraded its collective punishment of Gaza. There is an account of the curious journey the CIA's USSR 'dangle', Lee Harvey Oswald, made across Cold War Europe in June 1962, while the end of the apartheid regime in South Africa provided an opportunity for self-serving, power-hungry ANC politicians to 'feather their own nests' at the expense of the impoverished majority - a depressing example of a righteous liberation struggle turned sour.Meanwhile, the 'long war' continued. Operation 'Banner' was the codename given to the longest British Army deployment since 1945. In the North of Ireland, where the 36-year period of active service is referred to as the 'Troubles', clandestine military units, including the murderous Force Research Unit , waged a 'dirty war' against the Provisional IRA in particular, and the nationalist community in general. An estimated 763 British soldiers died and over 6,000 were injured during the 'Troubles'. An awareness of the 'back stories' to these issues is an important factor for the understanding of shadows.

Special Operations Forces (SOF) have never been an integral element of Canada's military capability. Although units have existed periodically throughout the country's history, they have always been in the shadows. However, the terrorist attack in the United States on September 11, 2001, changed that. In the aftermath of 9/11, SOF became the force of choice. Casting Light on the Shadows consists of a series of essays on SOF-related issues written by individuals with specialized knowledge and expertise in the field. As well as providing a solid foundation for SOF theory, historical background, and evolution, the book also highlights ongoing developments in SOF.

In Northern Ireland, the conflicting claims and aspirations of Catholic and Protestant, nationalist and unionist, republican and loyalist grate against each other, at each turn escalating the potential for renewed death and destruction. Hope for a peaceful future is not enough to cont with history. In Ulster, history has vanquished hope so often that it seems an act of folly to expect it to be otherwise. Until recently, the crisis in Northern Ireland was deemed a problem without a solution. Now that the major antagonists have agreed to work for peace and democracy, it is time for an authoritative assessment of "the troubles" that have plagued Ulster for more than a quarter century. A Belfast product of mixed Catholic and Protestant heritage, Jack Holland is both of and above the fray; he is the writer who has stayed close to the terrorists and antiterrorists of every persuasion since 1966. In this cogent and balanced history, he unravels the complex and often misunderstood story of "the troubles," offering an insightful look at the past, a thorough vision of the present, and a glimpse of what the future may hold.
