Chapter 4 Atomic Structure Atom V Element ATOMIC
THEORY Democritus (4th century B.C) said the universe was
made of invisible units called atoms In 1808, an Englishman
named John Dalton proposed a theory: 1. every element is
made of tiny unique particles called atoms that cannot be
subdivided 2. atoms of the same element have the same ...

PPT – Pearson Prentice Hall Physical Science: Concepts in ...
Solids have a definite shape and volume because particles in a solid vibrate about a fixed point Adding/taking Energy out of a system When you add energy to a system the particles begin to move faster As they move faster they collide and create friction (Heat) As they continue we get a phase change Six Common Phase Changes phase change: is the reversible physical change that occurs when a substance changes from one state of matter to another Six common phase changes: melting, freezing ...

Pearson Prentice Hall Physical Science: Concepts in Action
Physical Science: Concepts in Action helps students make the important connection between the science they read and what they experience every day. Relevant content, lively explorations, and a wealth of hands-on activities take students' understanding of science beyond the page and into the world around them.
