Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Help students build background knowledge, synthesize information, and increase their overall understanding of social studies topics with this collection of 20 highly motivating, reproducible graphic organizers. Teach writing skills using the Four Square method, which has been proven to work in classrooms just like yours. This revised and updated edition of the book also includes PowerPoint files filled with additional Four Square examples, activities, and writing exercises. The Four Square method can be used with all forms of writing and will fit any reading or language arts program. This step-by-step approach is built around a simple graphic organizer that first shows students how to collect ideas and then helps them use those ideas to create clear and polished prose. Open-ended reproducibles make the technique accessible to writers of all ability ranges. It is also great for content area writing.

Baked, stewed, or mashed, pumpkins remind Rebecca Estelle of the Great Depression when that was all her family had to eat. When an enormous pumpkin falls off a truck and smashes in her yard, Rebecca Estelle devises a clever way to get rid of the unwanted crop that sprouts.

"Includes over 20 graphics organizers. Lessons include a variety of reading genres: fantasy, realistic fiction, historical fiction, nonfiction, biography, folktales."--Cover.

The Common Core State Standards require schools to include writing in a variety of genres across the disciplines. Engaging Students in Academic Literacies provides specific information to plan and carry out genre-based writing instruction in English for K-5 students within various content areas. Informed by systemic functional linguistics—a theory of language IN USE in particular ways for particular audiences and social purposes—it guides teachers in developing students' ability to construct texts using structural and linguistic features of the written language. This approach to teaching writing and academic language is effective in addressing the persistent achievement gap between ELLs and "mainstream" students, especially in the context of current reforms in the U.S. Transforming systemic functional linguistics and genre theory into concrete classroom tools for designing, implementing, and reflecting on instruction and providing essential scaffolding for teachers to build their own knowledge of its essential elements applied to teaching, the text includes strategies for apprenticing students to writing in all genres, features of elementary students' writing, and examples of practice.

Make reading intervention engaging and effective for striving adolescent students. Thirty-five activities focus on phonemic awareness, phonics, fluency, vocabulary, and comprehension and are aligned with the College and Career Readiness Anchor Standards from the Common Core State Standards addressing literature and informational text, foundational reading skills, vocabulary, and speaking and listening. Step-by-step directions, materials lists, Common Core standards, variations for differentiated instruction, and reproducibles are included for each activity, and alternative assessment ideas, a reading interest survey, student reading suggestions by genre, and a cross-reference guide to the standards and activities complete this well-rounded resource. By design, these books are not printable from a reading device. To request a PDF of the reproducible pages, please contact customer service at 1-888-262-6135.

How does language comprise the implicit or explicit curriculum of teaching and learning in multicultural science settings? Building on a growing interest in the ways in which language and literacy practices interact with science teaching and learning to facilitate or obstruct successful student outcomes, this book contributes to scholarship on the role of language in developing classroom scientific communities of practice, expands that work by highlighting the challenges faced specifically by ethnic- and linguistic-"minority" students and their teachers in joining those communities, and showcases exemplary teaching and research initiatives for helping to meet these challenges. Offering teacher practitioners and researchers in the fields of science education and multicultural education lenses through which they can critically consider the myriad of classroom settings, instructional approaches, curricular materials, and scientific topics involved in what it means to teach science while pointedly addressing concerns about equity of educational opportunity, this volume serves as a powerful resource for linking theory and practice. End-of-chapter reflection questions and engagement activities facilitate discussion round these issues and provide rich opportunities for the reader to consider the implications of each chapter for science instruction and research and to apply insights developed in a real-world science teaching and learning contexts.
