AJAX is one of the hottest technologies in web development today. Mixing several widely used techniques (JavaScript, XML and server-side scripting), AJAX provides a user experience much improved over the ""traditional"" web page interface. In particular, it removes the need for a user to wait for a page to refresh before seeing the results of his or her actions, allowing the building of website interfaces that are much more reminiscent of those of desktop applications. Writing AJAX applications is not especially complex or technically challenging, but the architecture and operation of such app.

Provides information on using HTML, CSS, and JavaScript to design, create, and maintain Web sites, including formatting text, working with multimedia, and using external and internal links, with practical examples and exercises.
