In *The Black Sun*, Stan Marlan takes us on an unflinching and ultimately healing journey through the shadowed land of despair where most abandon all hope. There, we find, a strange light shines, and in that light we can discern what is otherwise invisible. Marlan teaches us how to see in the dark. — Murray Stein, author of *Jung's Map of the Soul*

The Black Sun is an esoteric symbol dating far back into antiquity, petroglyphs have been found in the Americas of this ancient symbol as well as artifacts discovered in 3000 year old graves of Nordic women such as the Zierscheiben pictured below. Since the masses are not taught true history or the true origins of most things this symbol is now mainly known for its placement in the floor at Wewelsburg Castle by the SS of the German Reich and the casual researcher won't look much further ...

Esoteric Meaning Of The Black Sun - Esoteric Awakening
The Black Sun is an extraordinary examination of the alchemical stage known as the "nigredo"..the blackening or mortification, so often experienced as depression, terror, or madness. I was especially transfixed at the way in which Dr. Marlan expresses the paradoxical nature of these experiences in that the darkness itself contains a "shine" or luminescence, that is the light of nature, not that of heaven.

Marlan's book *The Black Sun: The Alchemy and Art of Darkness* explores darkness as a metaphor for negative psychological experiences, such as despair and depression. As a rule, Marlan maintains, Western psychology treats such "dark" experiences as purely negative, i.e. as experiences to be avoided or, at best, "gotten through," rather than experienced and potentially valued on their own terms.

Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/86080> The black sun, an ages-old image of the darkness in individual lives and in life itself, has not been treated hospitably in the modern world. Modern psychology has seen darkness primarily as a negative force, something to move through and beyond, but it actually has an intrinsic importance to the human psyche. In this book, Jungian analyst Stanton Marlan reexamines the paradoxical image of the black sun and the meaning of darkness in Western culture. In the image of the black sun, Marlan finds the hint of a darkness that shines. He draws upon his clinical experiences—and on a wide range of literature and art, including Goethe's Faust, Dante's Inferno, the black art of Rothko and Reinhardt—to explore the influence of light and shadow on the fundamental structures of modern thought as well as the contemporary practice of analysis. He shows that the black sun accompanies not only the most negative of psychic experiences but also the most sublime, resonating with the mystical experience of negative theology, the Kabbalah, the Buddhist notions of the void, and the black light of the Sufi Mystics. An important contribution to the understanding of alchemical psychology, this book draws on a postmodern sensibility to develop an original understanding of the black sun. It offers insight into modernity, the act of imagination, and the work of analysis in understanding depression, trauma, and transformation of the soul. Marlan's original reflections help us to explore the unknown darkness conventionally called the Self. The multiple notions embedded within the black sun - relating to eclipse, transfiguration and alchemy - are explored in this beautifully produced publication conceived by artist Shezad Dawood.'Black sun' is a term with multiple meanings; it represents the eclipse of the day, but is also a symbol of esoteric or occult significance used in various belief systems.It is linked to the metaphor 'dark night of the soul', which is used to describe a phrase in a person's spiritual life, marked by a sense of loneliness and desolation, and which can be experienced in particular by those who are marginalised by ethnicity, sexuality and displacement.Accompanying a travelling exhibition at Devi Art Foundation, India, and Arnolfini, UK, this catalogue examines structures that look to deconstruct or displace our everyday modes of seeing.Including works by artists Ayisha Abraham, Tino Sehgal and Wolfgang Tillmans, amongst others, the texts and interviews provide an in-depth exploration of the black sun.

Stanton Marlan brings together writings which span the course of his career, examining Jungian psychology and the alchemical imagination as an opening to the mysteries of psyche and soul. Several chapters describe a telos that aims at the mysterious goal of the Philosophers' Stone, a move replete with classical and postmodern ideas catalysed by prompts from the unconscious: dreams, images, fantasies, and paradoxical conundrums. Psyche and matter are seen with regards to soul, light and darkness in terms of illumination, and order and chaos as linked in the image of chaosmos. Marlan explores the richness of the alchemical ideas of Carl Jung, James Hillman, and others and their value for a revisioning of psychology. In doing so, this volume challenges any tendency to literalism and essentialism, and contributes to an integration between Jung's classical vision of a psychology of alchemy and Hillman's Alchemical Psychology. C.G. Jung and the Alchemical Imagination will be a valuable resource for academics, scholars, and students of Jungian and post-Jungian studies, Jungian analysis, and psychotherapy. It will also be of great interest to Jungian psychologists and Jungian analysts in practice and in training.

Looks at the psychological nature of depression and discusses its portrayal in literature and art

Every human life is made up of the light and the dark, the happy and the sad, the vital and the deadening. How you think about this rhythm of moods makes all the difference. Our lives are filled with emotional tunnels: the loss of a loved one or end of a relationship, aging and illness, career disappointments or just an ongoing sense of dissatisfaction with life. Society tends to view these "dark nights" in clinical terms as obstacles to be overcome as quickly as possible. But Moore shows how honoring these periods of fragility as periods of incubation and positive opportunities to delve the soul's deepest needs can provide healing and a new understanding of life's meaning. *Dark Nights of the Soul* presents these metaphoric dark nights not as the enemy, but as times of transition, occasions to restore yourself, and transforming rites of passage, revealing an uplifting and inspiring new outlook on such topics as: • The healing power of melancholy • The sexual dark night and the mysteries of matrimony • Finding solace during illness and in aging • Anxiety, anger, and temporary Insanities • Linking creativity, spirituality, and emotional struggles • Finding meaning and beauty in the darkness

When her husband was diagnosed with a serious brain tumor, Marianne Tauber turned to art-painting and poetry-to cope with the situation. Years later, she explicates what was behind the drive to create, presenting seventeen paintings and poems alongside a narrative of the time of crisis in journal form and then delving into the concepts of Jungian psychology and alchemy to make sense of the images and their healing effect. "This is a gripping and powerful book, catalyzed by crisis and personal tragedy, but born of an imaginative and courageous spirit. Through her meditative discipline, painting, and poetry, Tauber looks unflinchingly into the darkest depths of her soul. Creatively developing an alchemical active imagination, she follows an arduous path, not only to psychological survival, but to redemption, greater wholeness, and wisdom. Replete with archetypal and symbolic amplifications, *The Soul's Ministrations* is a significant and scholarly contribution to Jungian literature and a valuable guide to anyone who must struggle with the tragic aspects of life or wishes to learn about the creative depths of the psyche." -Stanton Marlan, Ph.D., ABPP
