The Magic of Reality - Penguin Books Australia

Magic Leap 1 is a wearable spatial computer that brings the physical and digital worlds together as one. ... Augmented Reality can place an astronaut in the physical world. But the whole experience is trapped within a tiny handheld screen. It ’ s a spatial computer.

The best-selling author of The God Delusion and the artist of such award-winning graphic novels as Wizard and Glass address key scientific questions previously explained by rich mythologies, from the evolution of the first humans and the life cycle of stars to the principles of a rainbow and the origins of the universe. 150,000 first printing.

An elegant, text-only paperback edition of the New York Times bestseller that ’ s been hailed as the definitive authority on...everything. Richard Dawkins, bestselling author and the world ’ s most celebrated evolutionary biologist, has spent his career elucidating the many wonders of science. Here, he takes a broader approach and uses his unrivaled explanatory powers to illuminate the ways in which the world really works. Filled with clever thought experiments and jaw-dropping facts, The Magic of Reality explains a stunningly wide range of natural phenomena: How old is the universe? Why do the continents look like disconnected pieces of a puzzle? What causes tsunamis? Why are there so many kinds of plants and animals? Who was the first man, or woman? Starting with the magical, mythical explanations for the wonders of nature, Dawkins reveals the exhilarating scientific truths behind these occurrences. This is a page-turning detective story that not only mines all the sciences for its clues but primes the reader to think like a scientist as well.

Magic takes many forms. Supernatural magic is what our ancestors used in order to explain the world before they developed the scientific method. The ancient Egyptians explained the night by suggesting the goddess Nut swallowed the sun. The Vikings believed a rainbow was the gods ’ bridge to earth. The Japanese used to explain earthquakes by conjuring a gigantic catfish that carried the world on its back—earthquakes occurred each time it flipped its tail. These are magical, extraordinary tales. But there is another kind of magic, and it lies in the exhilaration of discovering the real answers to these questions. It is the magic of reality—science. Packed with clever thought experiments, dazzling illustrations and jaw-dropping facts, The Magic of Reality explains a stunningly wide range of natural phenomena. What is stuff made of? How old is the universe? Why do the continents look like disconnected pieces of a puzzle? What causes tsunamis? Why are there so many kinds of plants and animals? Who was the first man, or woman? This is a page-turning, graphic detective story that not only mines all the sciences for its clues but primes the reader to think like a scientist as well. Richard Dawkins, the world ’ s most famous evolutionary biologist and one of science education ’ s most passionate advocates, has spent his career elucidating the wonders of science for adult readers. But now, in a dramatic departure, he has teamed up with acclaimed artist Dave McKean and used his unrivaled explanatory powers to share the magic of science with readers of all ages. This is a treasure trove for anyone who has ever wondered how the world works. Dawkins and McKean have created an illustrated guide to the secrets of our world—and the universe beyond—that will entertain and inform for years to come.

From Bassem Youssef, aka the Jon Stewart of the Arab World, and author Catherine R. Daly comes a hilarious and heartfelt story about prejudice, friendship, empathy, and courage. Nadia loves fun facts. Here are a few about her: • She collects bobbleheads -- she has 77 so far. • She moved from Egypt to America when she was six years old. • The hippo amulet she wears is ancient... as in it’s literally from ancient Egypt. • She’s going to win the contest to design a new exhibit at the local museum. Because how cool would that be?!(Okay, so that last one isn’t a fact just yet, but Nadia has plans to make it one.)But then a new kid shows up and teases Nadia about her Egyptian heritage. It’s totally unexpected, and totally throws her off her game.And something else happens that Nadia can’t explain: Her amulet starts glowing! She soon discovers that the hippo is holding a helpful -- and hilarious -- secret. Can she use it to confront the new kid and win the contest?From The Daily Show comedian Bassem Youssef and author Catherine R. Daly comes a humorous and heartfelt story about prejudice, friendship, empathy, and courage.Includes sections of black-and-white comics as well as lively black-and-white illustrations throughout.

'Richard Dawkins is a thunderously gifted science writer.' Sunday Times Including conversations with Neil DeGrasse Tyson, Steven Pinker, Matt Ridley and more, this is an essential guide to the most exciting ideas of our time and their proponents from our most brilliant science communicator. Books Do Furnish a Life is divided by theme, including celebrating nature, exploring humanity, and interrogating faith. For the first time, it brings together Richard Dawkins' forewords, afterwords and introductions to the work of some of the leading thinkers of our age - Carl Sagan, Lawrence Krauss, Jacob Bronowski, Lewis Wolpert - with a selection of his reviews to provide an electrifying celebration of science writing, both fiction and non-fiction. It is also a sparkling addition to Dawkins' own remarkable canon of work. Plenty of other scientists write well, but no one writes like Dawkins... here is Dawkins the teacher, the scholar, the polemicist, the joker, the aesthete, the poet, the satirist, the man of compassion as well as indignation, the slayer of superstition and, above all, the scientist. - Areo Magazine

Science.

The renowned biologist and thinker Richard Dawkins presents his most expansive work yet: a comprehensive look at evolution, ranging from the latest developments in the field to his own provocative views. Loosely based on the form of Chaucer's Canterbury Tales, Dawkins's Tale takes us modern humans back through four billion years of life on our planet. As the pilgrimage progresses, we join with other organisms at the forty "rendezvous points" where we find a common ancestor. The band of pilgrims swells into a vast crowd as we join first with other primates, then with other mammals, and so on back to the first primordial organism. Dawkins's brilliant, inventive approach allows us to view the connections between ourselves and all other life in a bracingly novel way. It also lets him shed bright new light on the most compelling aspects of evolutionary history and theory: sexual selection, speciation, convergent evolution, extinction, genetics, plate tectonics, geographical dispersal, and more. The Ancestor's Tale is at once a far-reaching survey of the latest, best thinking on biology and a fascinating history of life on Earth. Here Dawkins shows us how remarkable we are, how astonishing our history, and how intimate our relationship with the rest of the living world.

"A worthy addition to the Feynman shelf and a welcome follow-up to the standard-bearer, James Gleick's Genius." —Kirkus Reviews Perhaps the greatest physicist of the second half of the twentieth century, Richard Feynman changed the way we think about quantum mechanics, the most perplexing of all physical theories. Here Lawrence M. Krauss, himself a theoretical physicist and a best-selling author, offers a unique scientific biography: a rollicking narrative coupled with clear and novel expositions of science at the limits. From the death of Feynman ’ s childhood sweetheart during the Manhattan Project to his reluctant rise as a scientific icon, we see Feynman ’ s life through his science, providing a new understanding of the legacy of a man who has fascinated millions.

Richard Dawkins explores the wonder of flight. A book for ages 8-80 about flying – from the mythical Icarus, to the sadly extinct but magnificent bird *Argentavis magnificens*, to the British Airways pilots of today.

One of the world's bestselling science communicators, Dawkins gives readers an opportunity to rethink the big questions. In 12 fiercely funny, mind-expanding chapters, he explains how the natural world arose without a designer--the improbability and beauty of the "bottom-up programming" that engineers an embryo or a flock of starlings--and challenges head-on some of the most basic assumptions made by the world's religions.religions.
