Presents the Swiss psychologist's thoughts, experiences, and everything he felt after a period of time spent seeing visions, hearing voices, and inducing hallucinations.

This book focuses on some of the main aspects and importance of The Red Book for the understanding of the work of C.G. Jung. It sheds light on the great mysteries of human nature and the new dimension uncovered by Jung and Freud: the universe of the unconscious and the possible ways to approach it.

Explores Carl Jung's theory that mythology and history of religion would begin anew, even if it was suddenly wiped away, because it lives in the human soul and describes the parallels inherent in classic and Western literature.

Edited by Murray Stein and Thomas Arzt, the essays in the series Jung's Red Book for Our Time: Searching for Soul under Postmodern Conditions are geared to the recognition that the posthumous publication of The Red Book: Liber Novus by C. G. Jung in 2009 was a meaningful gift to our contemporary world. "To give birth to the ancient in a new time is creation," Jung inscribed in his Red Book. The essays in this volume continue what was begun in Volume 1 of Jung's Red Book for Our Time: Searching for Soul under Postmodern Conditions by further contextualizing The Red Book culturally and interpreting it for our time. It is significant that this long sequestered work was published

during a period in human history marked by disruption, cultural disintegration, broken boundaries, and acute anxiety. The Red Book offers an antidote for this collective illness and can be seen as a link in the aurea catena, the "golden chain" of spiritual wisdom extending down through the ages from biblical times, ancient Greek philosophy, early Christian and Jewish Gnosis, and alchemy. The Red Book is itself a work of creation that gives birth to the old in a new time. Winning a Caldecott Honor for its illustrations of rare detail and surprise, The Red Book crosses oceans and continents to deliver one girl into a new world of possibility, where a friend she ' s never met is waiting. And as with the best of books, at the conclusion of the story, the journey is not over.

Until now, the single most important unpublished work by C.G. Jung—The Black Books. In 1913, C.G. Jung started a unique self- experiment that he called his “ confrontation with the unconscious ” : an engagement with his fantasies in a waking state, which he charted in a series of notebooks referred to as The Black Books. These intimate writings shed light on the further elaboration of Jung ' s personal cosmology and his attempts to embody insights from his self- investigation into his life and personal relationships. The Red Book drew on material recorded from 1913 to 1916, but Jung actively kept the notebooks for many more decades. Presented in a magnificent, seven-volume boxed collection featuring a revelatory essay by noted Jung scholar Sonu Shamdasani—illuminated by a selection of Jung ' s vibrant visual works—and both translated and facsimile versions of each notebook, The Black Books offer a unique portal into Jung ' s mind and the origins of analytical psychology.

In 1913, psychiatrist and psychoanalyst Carl Gustav Jung (1875?1961) experienced an episode of psychosis, seeing

visions and hearing voices in what he called a horrible ?confrontation with the unconscious.? But, instead of seeking to minimize the hallucinations after this initial episode, Jung believed there was tremendous value in this unconscious content and developed methods to encourage hallucinations. Over some sixteen years, he recorded his experiences in a series of small journals, which he later transcribed in a large, red, leather-bound volume, commonly known as 'The Red Book'. Jung never published the Liber Novus, as he called this pivotal part of his oeuvre, and left no instructions for its final disposition, and it therefore remained unpublished until recently.0'The Red Book Hours' complements the facsimile edition and English-language translation of 'The Red Book', published in 2009, and draws out the insights into Jung?s affinity with art as a means of personal insight.

area--the basic material for any DBMS professional. This fourth edition has been substantially updated and revised, with 21 of the 48 papers new to the edition, four of them published for the first time. Many of the sections have been newly organized, and each section includes a new or substantially revised introduction that discusses the context, motivation, and controversies in a particular area, placing it in the broader perspective of database research. Two introductory articles, never before published, provide an organized, current introduction to basic knowledge of the field; one discusses the history of data models and query languages and the other offers an architectural overview of a database system. The remaining articles range from the classical literature on database research to treatments of current hot topics, including a paper on search engine architecture and a paper on application servers, both written expressly for this edition. The result is a collection of papers that are seminal and also accessible to a reader who has a basic familiarity with database systems.
