History of Europe - The Thirty Years War | Britannica
Four centuries on, the Thirty Years War remains an enigma to many. Yet the three-decade struggle, which began in 1618 and ended in 1648, drew in all of Europe's major powers, laid waste to vast regions and killed eight million people. In fact, not until the First World War would Europe know such destruction or political upheaval.

A deadly continental struggle, the Thirty Years War devastated seventeenth-century Europe, killing nearly a quarter of all Germans and laying waste to towns and countryside alike. Peter Wilson offers the first new history in a generation of a horrifying conflict that transformed the map of the modern world.

Argues that religion was not the catalyst to the Thirty Years War, but one element in a mix of political, social, and dynastic forces that fed the conflict that ultimately transformed the map of the modern world.

Europe in 1618 was riven between Protestants and Catholics, Bourbon and Hapsburg--as well as empires, kingdoms, and countless principalities. After angry Protestants tossed three representatives of the Holy Roman Empire out the window of the royal castle in Prague, world war spread from Bohemia with relentless abandon, drawing powers from Spain to Sweden into a nightmarish world of famine, disease, and seemingly unstoppable destruction.

The horrific series of conflicts known as the Thirty Years War (1618-48) tore the heart out of Europe, killing perhaps a quarter of all Germans and laying waste to whole areas of Central Europe to such a degree that many towns and regions never recovered. All the major European powers apart from Russia were heavily involved and, while each country started out with rational war aims, the fighting rapidly spiralled out of control, with great battles giving way to marauding bands of starving soldiers spreading plague and murder. The war was both a religious and a political one and it was this tangle of motives that made it impossible to stop.

Whether motivated by idealism or cynicism, everyone drawn into the conflict was destroyed by it. At its end a recognizably modern Europe had been created but at a terrible price. Peter Wilson's book is a major work, the first new history of the war in a generation, and a fascinating, brilliantly written attempt to explain a compelling series of events. Wilson's great strength is in allowing the reader to understand the tragedy of mixed motives that allowed rulers to gamble their countries' future with such horrifying results. The principal actors in the drama (Wallenstein, Ferdinand II, Gustavus Adolphus, Richelieu) are all here, but so is the experience of the ordinary soldiers and civilians, desperately trying to stay alive under impossible circumstances. The extraordinary narrative of the war haunted Europe's leaders into the twentieth century (comparisons with 1939-45 were entirely appropriate) and modern Europe cannot be understood without reference to this dreadful conflict.

The Thirty Years War (1618-48) was the most destructive European conflict prior to the twentieth century. It reduced the population of central Europe by around a quarter and left thousands of towns and villages in ruins. This uniquely comprehensive collection of translated documents covers all aspects of the war in the words and images of those who directly experienced it, from the key political and military decision-makers, through the middling ranks of officers and envoys to the masses of ordinary soldiers and civilians, laity and clergy, women and men. Most of the material appears in English for the first time, including a variety of previously unpublished archival sources, all reproduced in their full original length. The wide range of sources covered includes: □ state documents □ treatises □ diplomatic and private correspondence □ diaries □ financial records □ artistic evidence Thematically organised, the material is supported by an

authoritative introduction, a guide to further reading and a full chronology, as well as extensive annotations explaining terms and points of detail. The rich source material and essential context that this book provides make it an invaluable resource for students and anyone interested in European and military history.

The Thirty Years War claimed more lives proportionately than either the First or Second World Wars – not only from battle and the endemic violence of marauding armies, but also from famine and plague. The bitter struggle encompassed the entire political and religious future of Europe and involved all the major players of the Continent. As the turmoil unfolded, vast mercenary armies exacted an incalculable toll upon helpless civilian populations, while their commanders and the men who equipped them frequently grew rich on the profits, leaving rulers perched on the brink of catastrophe. When peace came in 1648, the underlying tensions were far from wholly resolved. In *Europe in Flames* John Matusiak provides a compelling account of this most tumultuous time, exploring the causes, course and outcomes of a conflict that not only produced one of the greatest manmade calamities of its kind, but changed the direction of European history forever.

The Thirty Years War: A Documentary History fills a gap in recent studies of the great pan-European conflict, providing fresh translations of thirty-eight primary documents for the student and general reader. The selections are drawn from the standard political documents, from the Apology of the Bohemian Estates for the Defenestration of Prague to the text of the Treaty of Westphalia, as well as from imperial edicts, trial records, letters, diary entries, and satirical broadsheets, all directly translated from the Early New High German, French, Swedish, and Latin. The volume contains some ten

illustrations and one map . . . and on the whole is well organized and well presented with a judicious amount of footnotes and a slim For Further Reading section. A succinct introduction introduces the four sections, each with its own substantial introduction: (1) Outbreak of the Thirty Years War (1618-1623), (2) The Intervention of Denmark and Sweden (1623-1635), and (3) The Long War (1635-1648). The concluding section (4) Two Wartime Lives (1618-1648), interestingly juxtaposes the journals of a wandering mercenary and a settled townsman. The first is the diary of Peter Hagendorf, kept between the years 1624 and 1649 and only rediscovered in 1993. Hagendorf experienced the war as a common mercenary from the Baltic to Italy, from France to Pomerania. His counterpart is Hans Heberle, a shoemaker from a small town in the territory of the free imperial city of Ulm whose Zeytregister chronicled happenings both in the neighborhood and further afield. The engrossing accounts of their shifting fortunes over the three decades of the war really help to give this collection of texts, and the troublesome period itself, a human face. They are the stuff from which Grimmelshausen would craft his great novel of the war, *The Adventuresome Simplicissimus* (1668). Tryntje Helfferich is to be applauded for this consistently interesting and eminently useful volume. --Martin W. Walsh, University of Michigan, in *Sixteenth Century Journal*

The period 1618-1648 was one of the most complex in European history. Religion interacted with rebellion and dynastic rivalry in a series of conflicts in central Europe known collectively as the Thirty Years War. This book guides the reader through the period by surveying the narrative of events and establishing the essential chronological framework. In addition Stephen Lee looks at such key issues as the motives of the participants, their gains and losses, as

well as at the religious, military, social and economic aspects of the War. Each section in the book incorporates the most recent research.

The Thirty Years' War (1618-1648) remains a puzzling and complex subject for students and scholars alike. This is hardly surprising since it is often contested among historians whether it is actually appropriate to speak of a single war or a series of conflicts. Similarly emphasis is also put on the different motives for going to war, as conflicting religious and political interests were involved. This research companion brings together leading scholars in the field to synthesize the range of existing research on the war, which is still fragmented and divided along national historical lines, and to further explore the complexities of the conflict using an innovative comparative approach. The companion is designed to provide scholars and graduate students with a comprehensive and authoritative overview of research on one of the most destructive conflicts in European history.

Historians have tried time and again to identify the central issues of the conflict which devastated Europe between 1618 and 1648. *The Thirty Years War* by Ronald G. Asch puts the religious and constitutional struggle in the Holy Roman Empire squarely back into the centre of events. However, other issues are not neglected. Thus the problems of war finance are shown to be an important key to the interaction between inter-state and domestic conflicts during the war. Equally confessional tensions are analysed as a decisive factor linking international and domestic disputes, and the reader is provided with a succinct narrative account concentrating on the major turning points of the war.
