As you can see, JavaScript is very flexible! Not only can we assign a function to a variable, but we can also call functions inside of functions, and even return functions. Here are examples of...

Thinking in JavaScript: Callback Functions | by Daniel ...

Thinking of `x++` as `x = x + 1` is misguided, lazy thinking, and I shouldn't be surprised that it led me astray. Moreover, I was thinking of the first line all wrong, as well. What I thought was, the `[[]]` is making an array (the outer `[]`), and then the inner `[]` is trying to be a property access, which means it gets stringified (to `""`), so it's like `[""]`.
