Language Variation and Change is the only journal dedicated exclusively to the study of linguistic variation and the capacity to deal with systematic and inherent variation in synchronic and diachronic linguistics. Sociolinguistics involves analysing the interaction of language, culture and society; the more specific study of variation is concerned with the impact of this interaction on the structures and processes of traditional linguistics.

However, as time passes, language changes and becomes unpredictable among the same group of people. Variation and change in language continue to appear slowly but surely, as long as the atmosphere and surroundings change. The English language, for instance, is different now from Shakespearean English. One of the reasons for language variation and change is the influence deriving from various social pressures and prejudices on a society (Chaturvedi, 2015:107).

Variation is a characteristic of language: there is more than one way of saying the same thing. Speakers may vary pronunciation, word choice, or morphology and syntax. But while the diversity of variation is great, there seem to be boundaries on variation ∅ speakers do not generally make drastic alterations in sentence word order or use novel sounds that are completely foreign to the language being spoken. Linguistic variation does not equate with language ungrammaticality, but speakers ...
