2000s and were a very popular engine throughout Europe, with use in Volvo B7L buses. These engines can be converted to truck specification, the long motors are the same however, you'll need a donor engine to complete the conversion. The turbo assy, cooling assy, sump and flywheel housing are the key differences. Many customers have purchased these engines for us in the FL7 trucks ranging between 2001-2004.

Our D7E engine is equipped with a Diesel Particle Filter (DPF). It captures and processes the microscopic soot particles in engine exhausts during regeneration, leaving only a fine ash. The process is automatic, but when manual regeneration is needed – within an environmental zone for instance – you'll be alerted well in time.
